

## INDOOR – OUTDOOR DRAPERY PLATINUM COLLECTION

### CARE & CLEANING INDOOR – OUTDOOR

---

For best results, we recommend professional dry cleaning. Professional dry cleaning (any solvent except Trichloroethylene; low heat) is the recommended cleaning method.

#### SPOT CLEANING:

Due to the delicate nature of sheers, we recommend cleaning outdoor drapery fabrics with care and delicacy. Dilute a natural soap (like dishwashing soap; Dawn can be used successfully) in cold - lukewarm water. Sponge briskly and rinse thoroughly with clean water to remove dirt. Solution dyed Polyacrylic does not support mildew growth; however, mildew may grow on dirt and residue that has not been removed from the fabric, so regular cleanings are important. **AIR DRY ONLY. DO NOT STEAM.**

#### STUBBORN STAINS:

Chlorine bleach will not affect the coloration of the solution dyed Polyacrylic fiber and is therefore acceptable for stubborn stain removal. Chlorine bleach, strong chemicals or harsh detergents will eventually affect the strength of any fiber, so we suggest a diluted solution of one cup bleach and 1/4 cup of natural soap per gallon of water. Thorough rinsing is essential. **AIR DRY ONLY. DO NOT STEAM.**

#### BEST RESULTS:

Professional dry cleaning (any solvent except Trichlorethylene; low heat) is always recommended for tough stains.
